Preface

Indonesian Journal of Cancer Chemoprevention (IJCC) is an Indonesian leading journal in cancer chemoprevention with international level. We publish all aspects of cancer chemoprevention, including experimental and clinical pharmacology, cancer detections and also applications of stem cell technology, immunology research, *in vitro* and *in silico* exploration on chemoprevention mechanisms, screening of natural (plants, marine natural products, etc.) and synthetic chemopreventive agents, cultivation of chemopreventive plants and development of herbal dosage forms for chemoprevention, and development of herbal cosmetics formulation.

This issue contains various eight articles related to the development of chemoprevention agent. Mahdi *et al* explored the *in vivo* study of the fermented goat milk on hypercholesterolemic rats. Based on *in vitro* study, S. Zulharini *et al* investigated the inhibition of NF- κ B activity and apoptosis induction on HeLa cells by Indonesian endemic plant, *Phaleria macrocarpa*. Other study on cancer chemoprevention from natural agents was revealed by Purwaningsih *et al* with focus about the potency of *Thyphonium flagelliforme* L. in Raji cells. Haryanti *et al* describe the ability of *Ficus septica* leaves, *Caesalpinia sappan* L. and the combination among them with doxorubicin on 4T1 cells. The study about antigenotoxic effect of cinnamomum essential oil was conducted by Wikanthi *et al* using doxorubicin-induced CHO-K1 cells. In this issue, the empirical study of quality of breast cancer patient's life improvement by Jamu consumption has also been done by Zulkarnain *et al*. In this issue also published the study of SPF test from *Baccaurea lanceolata* Muell. Arg fruit isolates as proved by Hadi *et al* and also Jenie *et al* which reported that cytotoxic and antimetastasis effect of ethyl acetate fraction.

We wish to thank the authors contributed in this issue. Editors encourage other researchers to explore more combination chemotherapy agent and molecular mechanisms, and published the articles in IJCC.

Sincerely,

Dr. Arry Yanuar, M.Si., Apt.
